Research Practices and Philosophies among Malaysian In-Service Teachers

Hello there!!

This is a simple study developed to investigate the research practices and underlying philosophies that Malaysian in-service teachers currently embrace, both in and outside the classroom. Generally, this study looks at three different domains of research, namely: (a) experience in conducting research (b) common research practice (c) underlying research philosophies.

Your participation will help to determine to what extent research is integral to the professional practices of Malaysian teachers. In turn, this information would help to form the foundations of follow-up studies that would look into how teachers can incorporate and integrate research to inform their practice and encourage teacher development.

By providing your response to this questionnaire, you agree that:

- 1. There would be no means of withdrawal, retrieving and excluding the data that you have provided due to anonymity of the questionnaire, unless you have agreed to receive a copy of the findings
- 2. All submitted response would be kept electronically by the research up to a duration of 24 months
- 3. Raw data, and analysed data would be stored on cloud servers.
- 4. Only the researcher has access to the raw information provided here; and
- 5. The researcher is given consent to process the information provided here and present it verbally and in writing for academic and research purposes.

If you have any question concerning this questionnaire, kindly reach out to:

David Teh

6. Have you ever conducted any research/study before? * Mark only one oval.	
Yes	
No Skip to question 26.	

Experience in Conducting ResearchThis section mainly focuses on gathering information about your experience with research. Note that this also includes all forms of research that you may have conducted in your tertiary education, preservice training as well as throughout your service in schools or education departments.

7. How many research/studies that you are involved in as a lead/co-researcher in the past 10 years? *
Note: Please also include research/studies that you conducted in your tertiary education, research/studies that you participated in as a research assistant. Please DO NOT include research/studies that you participated in as a respondent or participant. Mark only one oval.
More than 10
