

Discovering Lincoln Researchers

LINCOLN
UNIVERSITY
TE WHARE WĀNAKA O AORAKI

PBRF 2018

Showed us the impressive research being undertaken at Lincoln University

Gave us an update of where academic staff are in their research career

Revealed that we haven't been telling our research stories as well as we could be

Current Profiles

- Lack of information on research focus
- Inconsistencies in style/content
- Not regularly updated

Expertise	Qualifications	Background	Research Outputs	Selected Publications
-----------	----------------	------------	------------------	-----------------------

Expertise

Emerging Market Finance, Corporate Governance

INTERESTS

Corporate Finance; Financial Markets and institutions in China; corporate governance, banking, emerging markets

Background	Research Outputs	Elements Publications
------------	------------------	-----------------------

Background

Member of:

- * Association of Australasian Chemosensory Science
- * Nelson Grapegrowers & Winemakers Association.

Background	Research Outputs	Elements Publications	Supervision
------------	------------------	-----------------------	-------------

Background

- * 2004-2007 CEO, The Natural Step New Zealand
- * 2002-2004 Board member, Environmental Risk Management Authority
- * Since 1998 Adjunct Senior Fellow, University of Canterbury, where I teach the MBA paper "Leading Sustainable Enterprises"
- * 1994 - present Founding director of sustainability consultancy
- * 1991-1993 Senior Manager, Ministry for the Environment
- * 1986-1991 Scientist & Principal Policy Analyst, Ministry for the Environment
- * 1985-1986 Scientist, Commission for the Environment
- * 1984-1985 Post-doctoral fellow Texas A&M University
- * 1980-1984 Scientist, Entomology Division DSIR

Discovery

- LU has purchased Discovery - a Symplectic product that is an 'add on' to Elements. Elements data will automatically populate the Discovery Profiles
- Profiles will be presented in a professional and searchable format (search by key words, department and name)
- Profiles will be “research centric”
- One click access to open access publications and publications in LU repository
- Researchers will be able to manage their own profile through Elements
- This project may encourage researchers to keep Elements updated!

Aims of the researcher profiles

- Promote LU research to a general audience
- Show who our researchers are (what they do, how, why, and the impact of their work)
- Enable people to find researchers for potential collaboration, expert opinion, supervision, mentoring, etc

Meet some of our 600 academic and non-academic staff.

BIO

Ideas of place, memory and emotion enrich our relationship with our landscapes, and memory and emotion are both integral to our understandings of place. This is the focus of my research and I apply critique, design and scholarship to explore this discourse. My book, *Melancholy and the Landscape* (2016) and my advisory work on public memorials, including selecting memorial designs and liaising on design development, especially for the Canterbury Earthquake National Memorial, Pukeahu National Memorial Park, and designing the memorial facilities for the Pike River Mining Disaster, are all furthering this area. I successfully explored these ideas in the international Imagination competition run by LA+ (University of Pennsylvania) to design an island, winning with an entry that imagined an island that is a vessel for memory. I publish regularly and am editor of *Landscape Review*, which has recently published special issues on design-directed research, issues on heritage and landscape, gardens as laboratories, and post-disaster recovery. I am a Fellow of the New Zealand Institute of Landscape Architects (NZILA).

ABOUTPUBLICATIONSRESEARCHPROFESSIONALTEACHING

BIO

My research uses modern applied chicken management methods to understand how educational achievement and equality in chicken coups around New Zealand can be improved. I am focused on producing policy-relevant studies. The specificity of my research approach stems from my knowledge of the field. It makes me very creative in finding new instruments for casual identification, while my network opens access to unique datasets. Generally speaking, my view of policy-relevant research is to look for unexploited dataset to provide new empirical evidence with simple, easy to communicate methods implemented thoughtfully, rather than using complex tools on largely investigated datasets.

About

Overview

My research uses modern applied chicken management methods to understand how educational achievement and equality in chicken coups around New Zealand can be improved. I am focused on producing policy-relevant studies. The specificity of my research approach stems from my knowledge of the field. It makes me very creative in finding new instruments for casual identification, while my network opens access to unique datasets. Generally speaking, my view of policy-relevant research is to look for unexploited dataset to provide new empirical evidence with simple, easy to communicate methods implemented thoughtfully, rather than using complex tools on largely investigated datasets.

[public](#) [Edit](#)

Research interests

My Research expertise is in the area of animal growth and development specialising in poultry.

[Add a language competency](#)

The Process so far...

Great buy-in – but can't do everything people want it to do (not a general staff or post grad student profile)

Latest Update coming out now – so will start testing and will finalise style guide. Also need to resolve how we will keep it up to date and keep researchers on message

New version will offer field of research tags/keyword and a powerful text search

Professional tab– we have adapted some of the PBRF research contribution types and are proposing to have:

- Awards and Appointments
- Professional Memberships
- Engagement and Impact
- Academic Service

Student supervision – where should it sit?

Photos

Every academic I meet in person
compared to the website biography
photo

[#academictwitter](#) [#phdchat](#)

Next steps

Training – drafted bios, prepopulated some fields, will get people to add employment, languages, web links, teaching statement, etc

Sign off – no one will go live unless they have had training and agree their profile is accurate

Going live – integrated into existing staff profile

Staff profiles will become part of induction process

ABOUTPUBLICATIONSRESEARCHPROFESSIONALTEACHING

TEACHING INTERESTS

I believe teaching is the most important service I provide to the Canterbury Community, because I am helping to educate a generation to function knowledgeably in a society where rapid technological advances constantly pose new questions and ethical challenges. I view teaching as inextricably linked with research scholarship. University education must go beyond simply passing on information. It should involve rigorous training in the methods of developing, analyzing, and communicating new knowledge.
