

TephraNZ: a major and trace element reference dataset for prominent Quaternary rhyolitic tephras in New Zealand

Dr Jenni L Hopkins

jenni.hopkins@vuw.ac.nz

Janine Bidmead (VUW), David Lowe (UoW), Richard Wysoczanski (NIWA), Brad Pillans (ANU), Luisa Ashworth (VUW), Andrew Rees (VUW), and Fiona Tuckett (VUW)

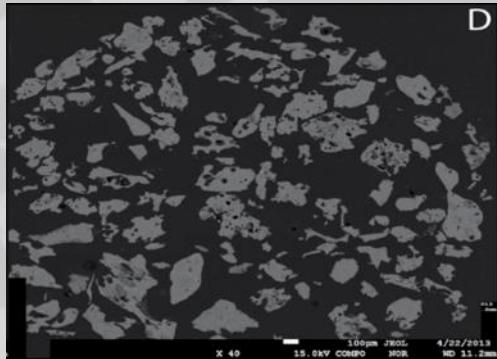

**CAPITAL THINKING.
GLOBALLY MINDED.**
MAI I TE IHO KI TE PAE

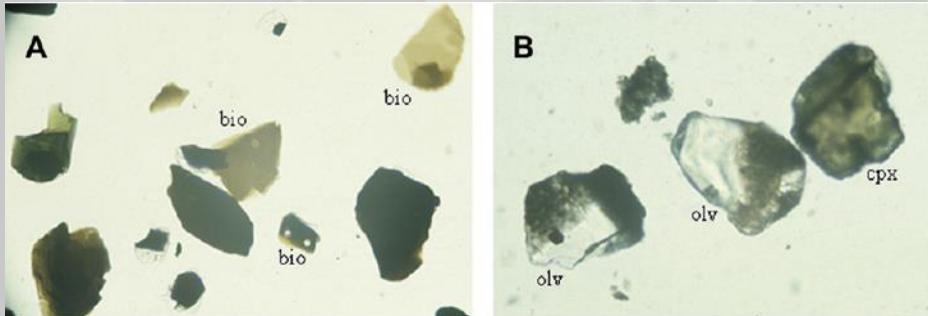

TephraNZ – the background

Glass shard geochemistry

- Reference data

Mineral assemblages

Dating techniques,
e.g. Zircon fission-track dating (direct)
or 14C dating (indirect)

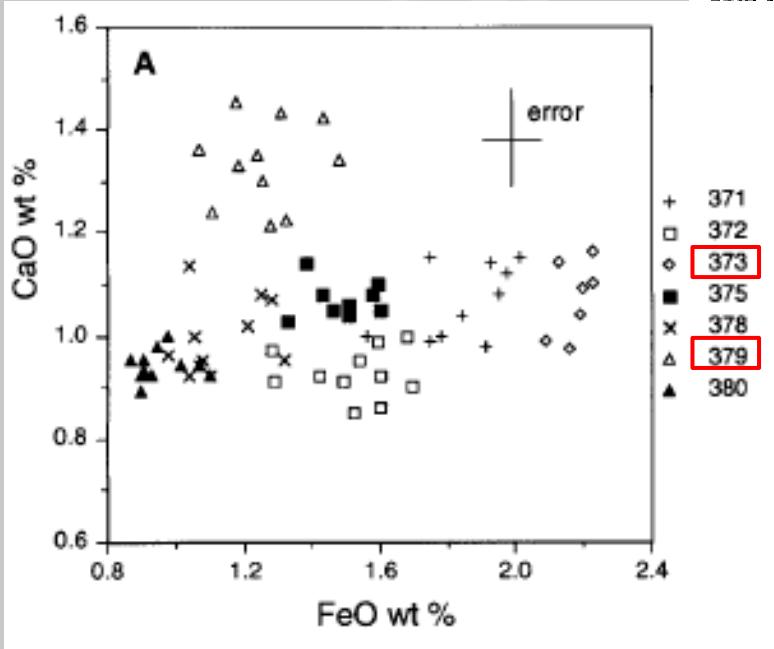

TephraNZ – the background

Sample no	371	372	375	378	380

X 11 X 10 X 9 10 10

Data from an undisclosed source

TephraNZ – the background

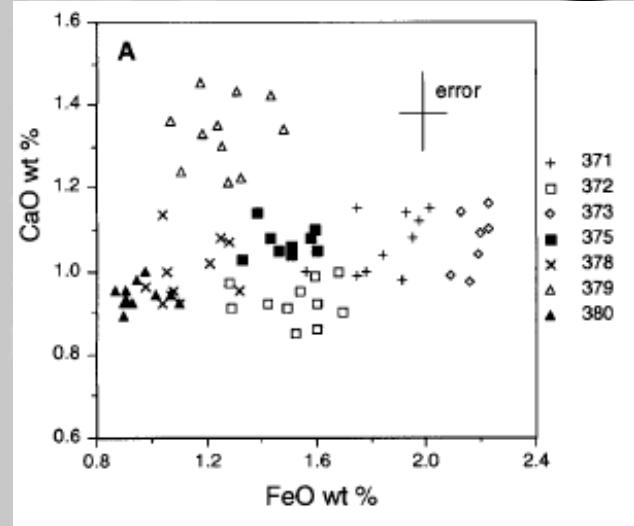

Unpublished data from X.Y. Zed

Or

Data from Wild et al., 1999

> data from Goose et al., 1990

> data from Chase et al., 1988

Tephra data is commonly untraceable and therefore useless for correlations

TephraNZ – the background

- Missing or incorrect data
- Just figures and no data
- Untraceable data
- Means + standard deviations or data ranges
- Range of ages for the data (out of date methods)
- Range of methods and standards
- HUGE range of publications

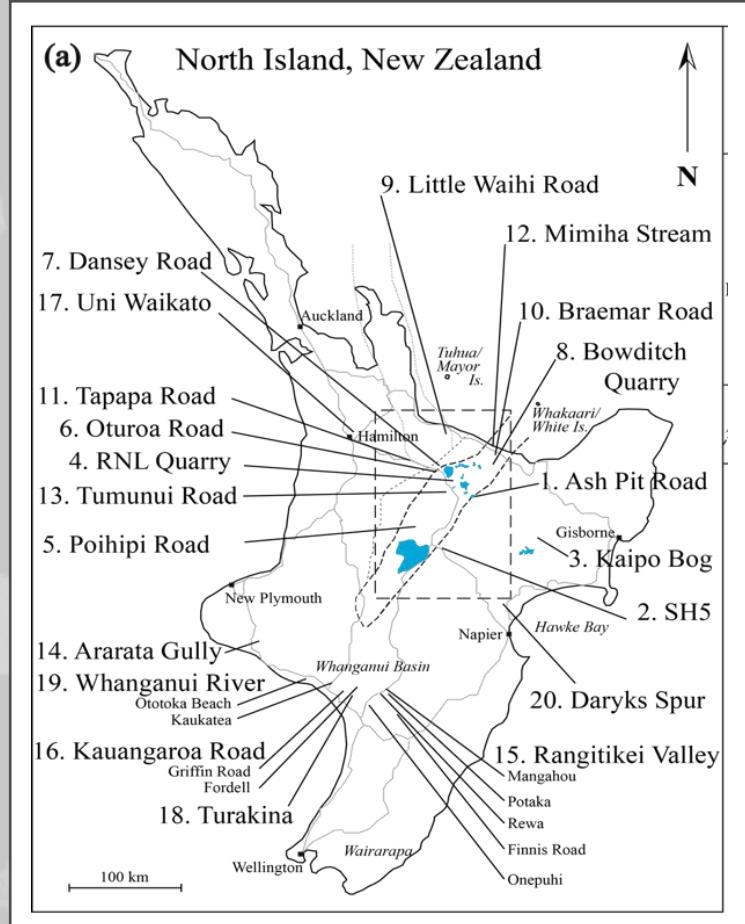

TephraNZ – the concept

To produce an open access reference dataset that is:

- Systematically analysed
- Comprehensively compiled
- Up-to-date
- High accuracy and precision
- Methodologically explicit

TephraNZ: a major and trace element reference dataset for prominent Quaternary rhyolitic tephras in New Zealand

Hopkins, J., Bidmead, J., Lowe, D., Wysoczanski, R., Pillans, B., Ashworth, L., Rees, A., Tuckett, F.,

Now(?) in open review at “Geochronology”

Soon to be live at tephranz.com and pet.gns.cri.nz
